

Venice tour - October 2016

Our four day trip to Venice saw us performing in 3 different churches. The first was Chiesa di Santa Maria dei Miracoli, a magnificent white marble church standing on the banks of one of the many canals.

The second was very special as we took a composer's work, Vivaldi's (pictured right) Gloria back to the church where he used to work, the Chiesa di Santa Maria della Pieta.

Finally to our last performance which was not in the centre of Venice but one of the outer resorts Jesolo, at the Chiesa di San Giovanni Battista. This was an imposing brick built church with great acoustics which led to a very uplifting performance which was much appreciated by the local audience who gave us a standing ovation. All in all a very enjoyable trip, we were sad to say "Arrivederci".
